HOMES

Why Choose a Maple Leaf Home?

- Your home is custom built to your specifications
- Premium building materials and craftsmanship
- Industry-leading warranty available
- Energuide and Energy-Star Certified
- Custom built interiors
- Maintenance-free exteriors
- Your home is built indoors, no weather delays, no waiting for sub-contractors

CLAIMaps legend

- ▶ The CLAIMaps legend can be displayed by clicking on the Map information
- ▶ Select the Legend option and the legend will appear on the left-hand side of your screen.

The screenshot displays the CLAIMaps software interface. At the top, there are three tabs: 'About', 'Navigation', and 'Map Information'. The 'Map Information' tab is selected. Below the tabs is a toolbar with various icons. The 'Legend' icon, which shows a list of items, is circled in red. To the right of the toolbar, there are buttons for 'Select Map Layers', 'Point', 'Search By Location', 'Query', 'Measure Area', and 'Measure Distance'. Below the toolbar, the 'Legend' panel is open, showing a list of map features. The 'Legend' panel is divided into two columns. The left column contains 'Administration Boundaries', 'Mineral Tenure Grid', 'Alienations', 'Unpatented Claim', and 'Disposition'. The right column contains 'Disposition Symbols' and 'Geology Layers'. The 'Disposition Symbols' section lists various mining rights and licenses, each with a corresponding symbol. The 'Geology Layers' section lists 'AMIS Sites', 'AMIS Features', 'Drill Holes', and 'Mineral Occurrences'. At the bottom of the 'Legend' panel, there is a button labeled 'View Base Legend', which is also circled in red. The background of the software interface shows a map of Ontario.

Trapline Transfers

- If a head trapper wishes to give up his/her trapline, they must provide written notification to the MNR or your PTO trapline administrator.
- It is recommended that the notification include any recommendations from the exiting head trapper with respect to their wishes for a replacement head trapper.
- If a registered trapline is vacant or if the head trapper has passed away, the family along with the Chief and Council should meet to discuss who the next head trapper should be.
- If required, the new head trapper would be given up to 6 months to obtain a trapping licence.

Municipal Type Service Agreement (MTSA)

INAC Funding

The level of support for an MTSA will be determined based on a community specific basis.

The following are some general guidelines (unofficial) showing the approximate level of funding for MTSA components:

- Collection costs – curbside pick up (50% suggested cost share)
- Transportation costs – transportation from (50% suggested cost share)
- Landfill Site Tipping fees (100% INAC)
- Recycling costs (50% suggested cost share)

There also is funding to support the development and implementation of MTSA's.
